

DECLARATION OF CONFORMITY

G3/4 pocket filters

Type	Pocket filter	
Frame	Galvanized profile, width 25mm	
Filtration media	100 % synthetic media	
Filtration efficiency class according to EN 779 standard	G3/4	
Initial pressure drop Pa	32 Pa (of the filter with 2,6 m ²)	
Efficiency according to ISO 16890	ISO coarse 60%	
Recommendations for the filter changing according to EN 13779:	<ul style="list-style-type: none"> • Recommended final pressure drop 250 Pa or maximum reached final pressure drop of 450 Pa • After 12 months since installation of the filter • After 2000 hours of filter use. 	
Temperature resistance	> 80° C	
<p>For the filtration in ventilation and air conditioning units of administrative, residential, industrial premises, hospitals, laboratories, medicine and food production and packaging companies, electronic component manufacturing facilities and other multi-purpose spaces.</p>
